

Welcome to MyBlueprint Education Planner

In School District 22 all high school students will complete core competency reflections, goal setting, and completing a three-year graduation plan on the Education Planner tool in MyBlueprint.

As a parent of a high school student in our district you are going to be invited to create an account that is linked to your child or children's account so that you can see what they are working on and provide input and feedback for them throughout the school year. You will only need one account linked to all your high school children.

 [Here is the](#) document to guide you through the steps to follow once you receive an email from MyBlueprint inviting you to link to your child's account has also been provided. The email will come from noreply=myblueprint.ca@app.myblueprint.ca so please check your junk email if you have not received an invitation to link to your child's account by October 15th.
